No thanks needed, Ed. WaterGen had to carry the water to make the meeting happen, and I appreciate everyone's travel efforts.

Made some edits to the participant list (see below).

I've got a meeting with my D.C. colleagues Monday morning and should get updates on the NSA/MTA/CRADA. Monday afternoon is busy with a visit by the administrator's liaison to ORD, and you may well be still digesting the eclipse. Tuesday morning may work better. I'm open 8-9 and 10-11.
